

**PHOTODYNAMIC THERAPY FOR THE TREATMENT OF ONYCHOMYCOSIS**

Onychomycosis is a common disease of the nail bed.

We are presenting a new portable device with LED at 450 nm.

**CLINICAL PROTOCOL**

After cleaning the nail plate with 70% ethanol, urea 40% (OniCleaner) is applied for one hour at least.

Curcumin 1.5% (OniFree) is applied for 30 minutes and all nail plate illuminated during 20 minutes.

**RESULTS**
